

LS FRC Epson Scanner instructions:

It's as easy as 1, 2, 3.....

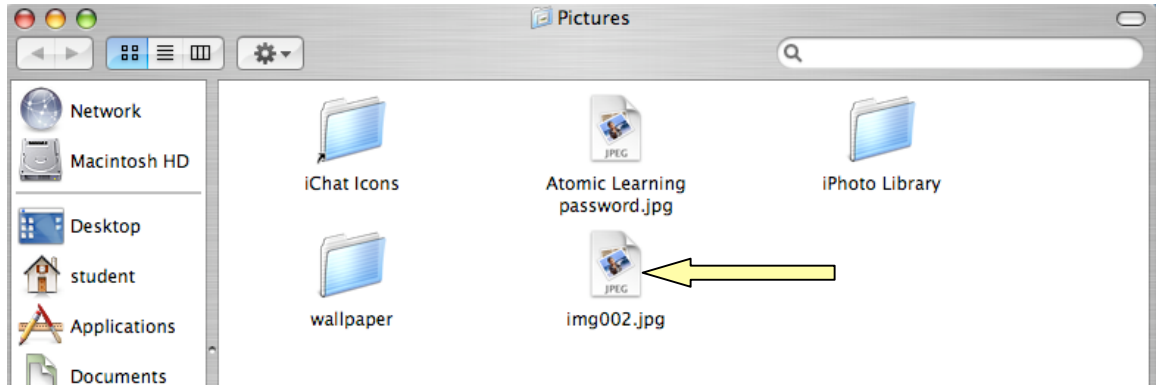

1. Look for the Epson scanner icon on the loading dock from the new computer in the FRC and click on it. You may get a message informing you it is warming up. The next screen you will see is the picture below. Click on the **Scan** button.

2. The next screen you will see is the one below. Click **OK**.

3. It will now scan your document. Once that task completes you will see the window below appear automatically. This is where it is storing your scanned document.

4. You can now use the file, move the file, rename the file, etc.

That's it. This is probably the easiest scanner we have in the LS since the default file saves your image as a jpg file automatically.
