

To download and install the FirstClass client for Macintosh computers

Go to <http://www.intl.firstclass.com/downloads/Clients>

Click on the Download Link named "**FC8326US.dmg**" version 8.3.26

FirstClass Client Downloads

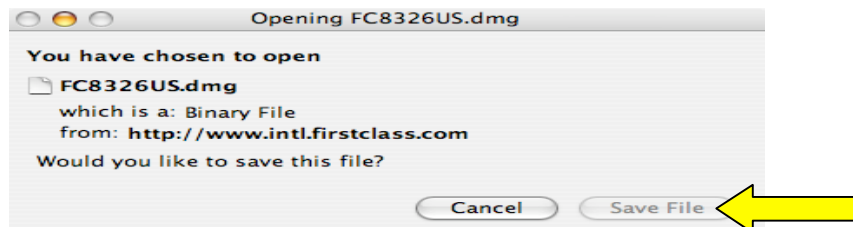

The following client software is available for download (a newer version may be available on our [main web site](#)):

Please note: the Windows components of the upcoming FirstClass 9 release will be fully compatible with all editions of the new Windows Vista Operating System. For users of 8.3 versions of the FirstClass Client, initial testing indicates that FirstClass 8.3 will run on Windows Vista, but that the installer will not. We plan on issuing a new version of the FirstClass 8.3 client installer concurrently with the FirstClass 9 release.

| Version | Operating System | Language | Read Me | Download Link | Size |
|---------|----------------------|--|---------------------------------|------------------------------|-------|
| 8.326 | Windows XP/2000/2003 |  UK English | Win Readme | FC8326UK.exe | 10 MB |
| 8.326 | Windows XP/2000/2003 |  US English | Win Readme | FC8326US.exe | 9 MB |
| 8.326 | Mac OS X (UB) |  UK English | Mac OS X Readme | FC8326UK.dmg | 18 MB |
| 8.326 | Mac OS X (UB) |  US English | Mac OS X Readme | FC8326US.dmg | 17 MB |

After you click on the download link the following window will appear:

Click on the button that says **Save File**

A white icon should appear on your desktop (a mounted disk image) and a window should appear with the firstclass installer. If you don't see the window, double-click on the white disk image icon.

Double-click the Install FirstClass Client icon and follow the instructions.

When the installer is finished, the application should start automatically. Look for a bouncing purple-and-yellow icon in your Dock. You should see the FirstClass login window. If it does not appear, do the following: click on the FirstClass icon in the dock, then go to the Collaborate menu and choose Connect.

In the login window, **click the Setup... button**. In the text field next to the Server: label, type "**fcmail.lovet.org**" and then click **Save**.

You should now be able to log into Lovett's FirstClass email server using your user name and password.
